DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meyers (U.S. patent 5,715,096).

Meyers discloses the claimed invention of a three lens element taking lens system (note col. 1, lines 5-9, and Figures 1A-1C, for example), having from the object side, a first lens element having positive optical power(U1), an aperture stop (AS), a second lens element having a positive optical power(U2), and a third lens element having a negative optical power(U3) and having a concave surface pointing to the image side (note Data Table 1A in col. 7), wherein the first and second lens element, one is a glass lens (E1) and the other is a plastic lens (E3). However, Meyers does not explicitly utilize a plastic material for the third lens element, but one of ordinary skill in the art would have known to use plastic for the third lens element because the third lens element is aspheric. It

has long been known in the lens art that to keep the costs of manufacturing low, an aspheric lens is made of plastic. Therefore, it would have been obvious to one of ordinary skill in the lens art to use a plastic material for the third lens element in order to lower the manufacturing costs of the lens system.

With respect to claims 6-8, please note Data Table 1A, in col. 7.

Allowable Subject Matter

3. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 9-16 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter:

The prior art fails to teach or fairly suggest the claimed subject matter of a three element lens taking lens system having the combination of claimed elements and claimed limitations, including as recited in claims 2, 3, 4 and 5, conditional statements which must be met by the combination of claimed elements; and as recited in claim 9, wherein the first and second lens elements, one is a glass meniscus lens element and the other a plastic meniscus lens element, and the third lens element is a plastic meniscus element with a specific orientation to the image side.
